At Bigelow, Tea is our Passion.

Tea trends and your customers:

- By offering a variety of teas you are able to appeal to more customers thus increasing sales. Tea is one of the fastest growing beverages and has a high profit vs. cost ratio.
- Tea is no longer a Fall/Winter drink... just like coffee it has become a part of everyday life.

How value added items can have a positive effect on their bottom line:

- All Bigelow Tea is packaged in protective pouches to protect the tea from moisture, ambient smells and water. The pouch also helps to provide a 3 year shelf life.
- We supply customers with complimentary tea racks and tea chests as long as they are purchasing our tea; we want to give you all the tools possible to help you grow sales.

How our “green items” can help you meet your customer expectations:

- Bigelow is an environmentally conscious company; we have added \$1.5 million dollars worth of solar panels to our facility which supplies 20% of our energy.
- 85% of material used for production and packaging is either recyclable or biodegradable.
- Bigelow is a local company out of Fairfield, CT. Bigelow has been around for almost 70 years and is still family owned and operated.

How new menu items can boost interest and sales:

- Rejuvenate your iced tea! By adding 5-6 flavored/herbal tea bags per gallon to fresh brewed iced tea you can easily create a new and exciting menu item with existing products. A small investment can lead to big sales.
- Popular choices are: Mint Iced Tea, Raspberry Iced Tea, Cranberry Apple Iced Tea... **easy to make, healthy and natural!**

How to handle the increasing demand for natural and gluten free items:

- All of our teas are natural and gluten free!!
